

What's New at ACUTE

New Courses

ACUTE has introduced more new courses this year including:

- Confined Space Rescue
- Lift Trucks
- Aerial Work Platforms (scissor lifts, boom lifts and portable lifts)
- Asbestos Abatement (Awareness, Worker and Supervisor)
- Lead on Construction Projects
- Mould Abatement Awareness
- Designated Substance Awareness

For more information on any of these courses please contact our office at 519-747-5075.

Training Simulators

ACUTE has recently added new training simulators to our facility. This includes a tank that can be used for vertical and horizontal confined space simulations. We have also added tunnels, which can be used for various practical exercises. This hands-on learning will provide valuable reinforcement of the theory components of our courses.

Please drop by and see our new equipment.

ACUTE's new confined space entry simulator in use

Open House!!

April 29, 2009

4:00 p.m. To 7:30 p.m.

Ministry of Labour – Safety Blitz

Ontario is continuing its efforts to reduce workplace injuries by cracking down on hazards involving construction equipment and materials handling at construction sites in 2009.

Inspectors will focus on:

- the quality of equipment operators' training and supervision
- adherence to equipment manufacturers' operating instructions
- the presence and use of roll-over protection
- the adequacy of equipment maintenance
- proximity to overhead power lines
- the adequacy of excavation shoring
- worker exposure to carbon monoxide
- procedures for handling materials safely, and
- the protection of workers from being struck by construction equipment or road traffic.

In the Spotlight ... JHSC Certification

Did You Know?

- Any company that regularly employs 20 or more workers is required to create a Joint Health and Safety Committee.
- A minimum of one worker representative and one management representative on the committee must be "certified" members.
- The Part One Course delivers the certification requirements common to all workplaces that every member seeking certification must complete.

You Will Learn By:

- Classroom Interaction with Highly Experienced Instructors
- Detailed Handouts, Videos, Quizzes

Our Course:

- Is a 3 Day course certified by the WSIB.
- Is appropriate for participants with all levels of health and safety experience - from novices to experts.
- Provides additional tips and information for developing an effective committee.
